

SPEC SHEET

Automatic Straight Line Piston Filling Machine

ZCJY-50

INTRODUCTION

A Piston Filling Machine is used to fill containers with a wide range of liquids or other products.

It is suitable for products of various viscosity such as water injection, semifluid and ointment etc. It is used in a range of industries such as food, cosmetics, medicine, chemical industries, as well as also being suitable for detergents, pesticides and a host of other uses. By adopting a straight line filling mode, the machine can be used to fill solutions of different types without the need of adding any additional parts.

KEYWORDS Piston Filling | Liquids | Semifluids | Straight Line

ATTRIBUTES

- Dual use filling machine.
- Injection series/ normal pressure gravity type.
- Wide range of industry applications.
- Applicable to a variety of viscosities.

TECHNICAL PARAMETERS

Filling speed	45-55 Bottles/Min (500ml/8 Head)
Filling precision	±1%
Cylinder specification	50-1000ml
Working pressure	5-7 kg/m2
Weight	800kg
